

LAGUNA WOODS AMATEUR RADIO CLUB INVITES YOU TO
FIELD DAY JUNE 26,2021

WHAT IN THE WORLD IS **FIELD DAY?**

On this day more than 45,000 Amateur Radio Operators join with other operators around the world to test their mobile communication and performance skills that they have practiced throughout the year.

The primary purpose of **Field Day** is to ensure that Amateur Radio operators are prepared to move their equipment to a safe location and can assist **First Responders, Security Forces and Disaster Task Forces** in case of a disaster or major emergency or when all communication, such as cell phones, computers and electricity is disabled.

Field Day, while especially important and intensive, is also **FUN!** Participants can be involved with speaking to HAMS in other states and other countries. Or you may enjoy standing by as an observer.

The Laguna Woods Amateur Radio Club, although a small organization, takes emergency radio communications very seriously. We have weekly radio exercises to practice the nationwide procedures.
