

President's Message July 2019

I am so proud of all our volunteers who spend from 3 to 10 hours every week volunteering, teaching and keeping the equipment running. Over the three years I have been President we have never had to close the room due to a shortage in staffing. If you are interested in joining our cadre of volunteers contact the Room Supervisor and we will meet to see where you could fit into our tasks.

We have added 3 new classes. First, Gene Hollaway prepared and taught an eight week photography class on iPhone/iPad that was such a success we had to limit the number of students attending. We also just completed our first Apple Watch class prepared and taught by Ron Plain. Again a full house. Gene also prepared and taught a four week photography course which included a Chinese interpreter.

The residents are very pleased with what they are learning and many support our club by joining with a year round membership. We will be repeating the classes again soon. Check the Globe, the email blast to members and our website for upcoming classes.

The club installed an iPad on one of the desks for use by anyone and we have purchased some MacBooks and additional iPads for use in the classes. Our library continues to be updated with instructional books for all Apple devices. Printing and scanning services are available. We are evolving as the technology changes and can help you with your device concerns and questions.
