

What is the Mac Club August 2021

The Mac Club is a service club for Laguna Woods Village residents and is located on the 3rd floor of the Community Center. Like all clubs in the Village, we operate under the Recreation Department's rules and guidelines, and our Bylaws. The Village is fortunate that GRF provides the facility and Apple computers for the use by our community. This facility is the Mac Club's Learning Center.

The primary mission of the Mac Club is to provide access to the Apple computing facility for the use by residents. When residents visit the room to use a computer, we are fulfilling our primary mission.

Helping residents with questions or problems with their Apple devices is our secondary mission. All volunteers happily perform this mission to the best of our ability, but if a particular Room Supervisor is not able to help with your particular question or problem, we usually have another one who can.

In addition the Mac Club provides other services not provided by GRF. These include our many classes taught by volunteer instructors, printing documents from your iPhone or iPad, and scanning documents and photos. Equipment such as classroom tables, large screen TVs, media equipment, printers and scanners are purchased by your memberships and donations without GRF financial help.

Providing these services would not be possible without a group of dedicated volunteers. In addition to the Room Supervisors we have volunteers managing our equipment, finances, website, library, membership, communications, teaching, and serving on our Board of Directors. If you would like to join our friendly group of volunteers, please speak to a Room Supervisor and we will meet with you to discuss the many volunteer opportunities the Mac Club offers.
